Developer passionate about learning. Experience in Fullstack Development

---

## #Skills

Front End	Back End	Source Control	Frameworks / Libraries
HTML/CSS JavaScript ES6	JavaScript C, C# MySQL Firebase	Git Github	React, Redux, Material UI Bootstrap, Tailwind CSS Wordpress ASP.NET

---

## #Projects

### Shopping site

[Demo](#)

[Code](#)

Multi-page react web application. Products in the shop are fetched from an api. Customers can add items to cart, increase or decrease quantity of items and delete items from the cart. Handling CRUD operations with Redux. Material UI used for popup messages and icons.

### Crypto price checker

[Demo](#)

[Code](#)

React web application for checking the latest cryptocurrency statistics. In this application, my focus was on simplicity and design. The data is fetched from an api.

### Team Management web app

[Demo](#)

[Code](#)

This application is made in react and utilizes a firebase backend. Users can create, read, edit and delete members of the team.

### Portfolio website

[Demo](#)

[Code](#)

For this website my goal was simplicity and modern design. It is made in React and all styling is done with CSS3. Material UI was used for icons.
