Developer passionate about learning. Experience in Fullstack Development

#Skills

Front End	Back End	Source Control	Frameworks / Libraries
HTML/CSS	JavaScript ES6	Git	React, Redux, Material UI
JavaScript ES6	C, C#	Github	Bootstrap, Tailwind CSS
	MySQL		WordPress
	Firebase		ASP.NET

#Projects

// All projects can be found on my portfolio site and GitHub.

Shopping site [Demo](#) [Code](#)

Multi-page react web application. Products in the shop are fetched from an API. Customers can add items to the cart, increase or decrease the number of items and delete items from the cart. Handling CRUD operations with Redux. Material UI used for popup messages and icons.

Crypto price checker [Demo](#) [Code](#)

React web application for checking the latest cryptocurrency statistics. In this application, my focus was on simplicity and design. The data is fetched from an API.

Team Management web app [Demo](#) [Code](#)

This application is made in react and utilizes a firebase backend. Users can create, read, edit and delete members of the team.

Portfolio website [Demo](#) [Code](#)

For this website, my goal was simplicity and modern design. It is made in React and all styling is done with CSS3. Material UI was used for icons.

Font Change desktop app [Code](#)

Desktop app for changing default windows font. It is written in C# and uses a registry script to change the font. Made for personal use.

Dog Show desktop app [Code & Demo](#)

An object-oriented application is written in C# using MySQL backend. Users can add new dogs to scheduled shows and see statistics for each show.

#Education

Faculty of Technical Sciences, Data Engineering

Sept 2022 - Current: Novi Sad, Serbia
